Technical Data Sheet

Designation CAMLOCK COUPLINGS

Brand CAMLOCK **Ref. No.** CLC001

General Description

Advantages of Camlock couplings:

- Quick and secure connection: hoses and equipment can be connected and disconnected immediately, without tools;
- Simple operation: the lever system makes handling easier, reducing operating time and the risk of error;
- Versatile applications: suitable for transferring and suctioning liquids in many sectors, including industry, agriculture, construction and maintenance;
- Broad compatibility: available in various configurations (male-female, internal/external threads, reducers, caps, unions and flanged versions), allowing integration with different systems;
- Robustness and durability: made of resistant materials — aluminium, brass, stainless steel or polypropylene — ensuring a long service life and reliable performance;
- Low maintenance: the simple design and absence of complex mechanisms reduce the need for technical intervention.

Features

- Camlock couplings available in aluminium, brass, stainless steel and polypropylene;
- Various connection and reducer types;
- Quality and durability;
- Additional Products
- Mounting accessories not included;

Standards, certificates, marking and documentation

- Manufactured in accordance with EN14420-7;

How to order

- Ref. CLC001_Camlock [size] [connection type].
