Technical Data Sheet

Designation 25MM BRANCH-PIPE NOZZLE, ALUMINIUM AND ABS, ADJUSTABLE FLOW

Brand IMPARTE/IMPARTEX **Ref. No.** AG25LC

General Description

In firefighting every detail makes a difference, and nozzles play a leading role in the effectiveness of the operation. Fitted at the end of the hoses, their job is to turn force into precision, directing the water jet with characteristics suited to each type of intervention.

The main features of our nozzles are:

- Efficient projection: they direct the flow powerfully and have adjustable flow control, reducing waste and increasing effectiveness;
- Versatile application: they adapt to different scenarios — from urban fires to industrial environments;
- Robust design: they are made of pressure-resistant materials, ensuring durability and safety;
- Adjustable models: they allow variation from fog (for cooling) to a concentrated jet (for direct suppression).

With ergonomics designed for easy handling, our nozzles offer comfort and agility even in the most demanding situations. They are compatible with various types of hoses and firefighting systems.

Applications: fire brigades, industrial fire teams, commercial buildings, condominiums, factories, livestock and agricultural units and Civil Protection.

Features

- Nozzle with body and rotating handle made of aluminium, opening and closing controlled by turning the handle 180°, red and silver;
- Close/open direction marking;
- ABS tip and body protection;
- 3-effect nozzle: shut-off/fog/jet;
- Working pressure: maximum 6bar;
- Jet range: approx. 12m;
- Weight: approx. 1.2kg.
- Lightweight, robust construction;

Additional and/or Optional

- Can be crimped/wire-bound with Storz 25 or directly to DN25 hose with a crimp ring or hose clamp;
- Hose wire-binding and crimping service (on request);

How to order

- Ref. AG25LC_25mm branch-pipe nozzle.
