Technical Data Sheet

Designation **2” GLOBE-TYPE HYDRANT VALVE WITH 2” BSP INLET (BSP22) British Standard Pipe**

Brand **CNBOP/BDT** **Ref. No.** **BCG102; BCG107**

General Description

Globe valves are devices designed for precise control of fluid flow, regulating its passage by means of a movable disc inside a spherical body.
They stand out for their strength, excellent sealing and efficient flow regulation, and are widely used in industrial and hydraulic systems. Thanks to these characteristics, they are used in commercial, industrial and residential buildings, providing greater safety in firefighting.

Features

- Brass body;
- Valve, manually operated by handwheel, to open/close the water flow;
- Die-cast aluminium handwheel with 70µm thermosetting electrostatic powder coating, RAL 3001 "Red";
- Rubber seal;
- PN16: nominal pressure 16 bar;
- Delivery outlet to feed the water line with flexible hose via Storz coupling;
- For best performance, install with the water outlet facing the floor, forming an angle of no less than 30° and no more than 50° in the vertical plane;
- High durability and corrosion resistance;

Connections

- 50mm fire-service thread;
- With 52mm Storz flange and cap;
- 2” BSP inlet;

Standards, certificates, marking and documentation

- In accordance with Ordinance (Portaria) 1532/2008;

Additional Products

- Box for globe-type valves;
- Frame and door for globe valves;
- Pressure gauge;
- Photoluminescent signage in accordance with 92/58/EEC;
- Guillemin/Instantaneous adapters;

How to order

- Ref. BCG102: standard;
- Ref. BCG107: with Storz.
