Technical Data Sheet

Designation **4-POSITION CROSS KEY FOR HYDRANT VALVES**

Brand **IMPARTE/IMPARTEX** **Ref. No.** **CH002**

General Description

Cross keys for hydrant valves are essential tools for firefighting and system maintenance. They are made to operate hydrant valves, opening or closing the water flow. When a fire breaks out, fire fighters use the keys to open the valve and release the water flow to the hydrants.

Cross keys are made of resistant materials such as steel or metal alloys, ensuring they can withstand the pressure and torque needed for operation.

Cross keys should be checked regularly to ensure they are in good condition, and stored in dry places protected against corrosion.

Features

- Key made of iron;
- 70µm thermosetting electrostatic powder coating, RAL 3000 "Red";
- Sturdy and highly durable.

How to order

- Ref. CH002: 4-position cross key.

As an innovative company, IMPARTE S.A. reserves the right to change product specifications, models and standard equipment without prior notice and without incurring any obligation.
