Technical Data Sheet

Designation **KEY FOR SOMEPAL PILLAR HYDRANTS**

Brand **FUCOLI-SOMEPAL** **Ref. No.** **CH008**

General Description

In brief, a pillar hydrant consists of a head, a column body and outlets with connections that are usually of the Storz type.
Fire brigade hoses are coupled to these outlets to draw water.
When a fire breaks out, fire fighters use the pillar hydrant key to open the valves and release the water flow.
Water flows through the outlets, allowing the hoses to be directed at the seat of the fire.
The pillar hydrant key is essential to ensure fast, effective access to water during firefighting.

Features

- Universal operating key allowing fire brigades to operate Somepal, Classic and Ignis pillar hydrants;
- Made of EN-GJS-500-7 ductile cast iron;

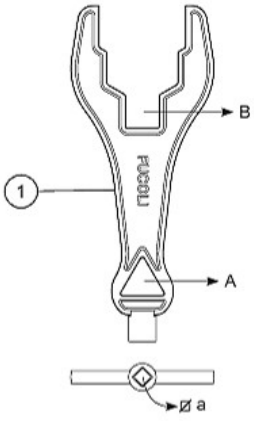

Standards, certificates, marking and documentation

- Manufactured in accordance with EN 1563;

How to order

- Ref. CH008_ Key for Somepal pillar hydrants.

Retirar o capacete do marco de incêndio Somepal

Operação de abertura e fecho do marco de incêndio Somepal

Abrir as bocas storz anti-roubo do marco de incêndio Classic

Operação de abertura e fecho do marco de incêndio Classic

Operação de abertura e fecho do marco de incêndio Ignis
