Technical Data Sheet

Designation CONVEX POLYCARBONATE SAFETY MIRROR

Brand IMPARTE/IMPARTEX **Ref. No.** EP10; EP13; EP14

General Description

Convex safety mirrors made of polycarbonate stand out for their high durability and resistance. They are widely used for monitoring and surveillance in companies, condominiums, shops, warehouses, factories, gatehouses, garages and lookout posts.

Installing them is an excellent way of preventing theft, acting as a deterrent to petty theft or offences in retail areas, thanks to their wide 180° field of view.

The convex mirror should be placed at strategic points — entrances, exits and "blind spots" — to make it easier to see people or vehicles approaching, allowing a more accurate assessment before a robbery or other risk situation occurs.

It provides a sharp image with minimal distortion, ensuring greater safety and efficiency in surveillance.

Features

- Polycarbonate reflective surface;
- Reflective surface mounted on the base by an aluminium "U" profile with a synthetic rubber seal;
- Electro-galvanised sheet steel base;
- Adjustable bracket in cast aluminium and powder-coated steel for wall or post mounting;

Additional Products

- Post, in a length to be defined/advised;
- Aluminium bracket for mirror;
- Steel bracket for mirror;
- Other photoluminescent signage in accordance with 92/58/EEC;

How to order

- Ref. EP.10_300 mm polycarbonate mirror;
- Ref. EP.13_600 mm polycarbonate mirror;
- Ref. EP.14_800 mm polycarbonate mirror.
