Technical Data Sheet

Designation **LATCHES FOR FIRE SERVICE CABINETS**

Brand **IMPARTE/IMPARTEX** **Ref. No.** **FE004; FE005; FE007**

General Description

Cabinets for hose reels must be designed to ensure safety, functionality and quick accessibility in emergencies. It is therefore essential that these cabinets:

- have a sturdy lock capable of protecting the equipment against tampering or unauthorised access;
- have an emergency opening system, allowing the hose reel to be reached quickly, even in adverse conditions such as poor visibility.

Latches should be made of appropriate materials, such as:

- metal, for its high mechanical strength and durability; or
- polyethylene or polypropylene (PP), when lightness, corrosion resistance and easy maintenance are required;

This set of features, among others, ensures that the equipment is properly protected and accessible, contributing to an effective first response to fires.

Features

- Ref. FE004: Yale-type lock:

Zamak body (metal alloy of 4 elements: zinc, aluminium, magnesium and copper);
Size: 37x10.5mm.

- Ref. FE005: Triangular lock:

Zamak body;
